FIBERGLASS TRIM

# FIBERGLASS TRIM

## Intricate Designs with Superior Strength

The architectural fiberglass trim system from Tecton® Products is designed to replicate the decorative beauty of ornate wood exterior trim minus the hassle of painting and maintenance. The molded detail and lasting beauty of fiberglass trim adds immediate and sustained resale value because of its durability and resistance to mold, rust and extreme temperatures.

- Consistent, crisp, molded decorative detail
- Low expansion and contraction means it won't gap or buckle
- Low maintenance Durion® finish
- Doesn't distort at temperatures up to 350° F
- Won't oxidize or rust from chemicals or acid rain
- Resists condensation so it won't rot or deteriorate
- Impact resistant
- Adds curb appeal and resale value

Our leading-edge technology creates interconnecting exterior trim parts and cover caps to form the fascia, soffit, gutter, frieze and crown mouldings with simple installation.

## Adds Distinction and Value

From a classic, crisp outline to intricate details and contemporary touches, the trim of any building is what sets it apart and attracts admiration. Elevate the curb appeal and resale value of your property with maintenance-free fiberglass trim.

## Virtually Maintenance Free

Tecton's architectural fiberglass trim is created in continuous lengths of fiberglass. The exposed surfaces are coated with our patented Durion® finish which provides exceptional color and better weatherability than painted products. The final result is a fiberglass product that is virtually maintenance free.

Tecton Products offers the following colors for architectural fiberglass trim.

Diamond  
White

Herringbone

## Call Us Today!

Tecton's building system includes structural siding, architectural trim and door frames. We also produce the fiberglass framing for Integrity® and Infinity® windows and offer custom fiberglass pultrusions for other OEM applications.

## Fiberglass is Chemical and Corrosion Resistant

Fiberglass building products are resistant to many chemicals and acid rain that damage other materials. You don't need to worry about oxidation, rust or the corrosive effects caused by harsh coastal environments.
